App Name	Description	Platform Type	Vendor Name
Cactus DS	Turn your HP printing devices into digital signage communication displays. With the Cactus application installed on your device you can display messages, images, videos, weather and all the corporate information of your company. You can also schedule content to be displayed at the right time. All configurable from anywhere with web access.	WorkPath	Cactus DS
HP for iManage	<p>HP for iManage makes it easy to scan to and print from your iManage cloud account by directly integrating iManage with the printer control panel. The direct connection optimizes the workflows surrounding document handling, eliminating several manual steps to scanning documents to emails and then transferring them to iManage in separate steps, dramatically improving worker efficiencies. The entire directory structure from iManage is visible on the control panel, allowing users to place documents into the correct folder. Other features include:</p> <ul style="list-style-type: none"> <li>The ability to Search across multiple databases to locate folders for new documents or print additional documents while at the printer.</li> <li>Manage documents and create document metadata directly from the control panel into iManage</li> <li>The ability to easily locate stored documents using enhanced search and filter capabilities.</li> <li>Integrated account sign in steps eliminate the need to sign in to both devices and iManage separately.</li> </ul>	WorkPath	HP Inc.
Connect to Salesforce	Created by In Time Tec, Connect to Salesforce allows you to simplify your workflow. Using the printer interface, you can easily scan directly to your Salesforce contracts. Connect to Salesforce saves time and improves contract attachment saving and printing easy. Set up is easy, as it integrates with the existing infrastructure for authentication and tracking. For pricing, please visit our website. <a href="https://intimetec.com">https://intimetec.com</a>	WorkPath	In Time Tec
Connect to SmartVault	Connect to SmartVault is an easy-to-use, intuitive app that makes it simple for you to securely scan and upload important documents directly into SmartVault using any Workpath-enabled HP device, and to print documents directly from your SmartVault account on the MFP device. The user can login to Connect to SmartVault from any Workpath-enabled HP device using an existing SmartVault account. Instead of scanning, emailing, and saving, users can choose the folder and scan the file directly to that destination from the Connect to SmartVault app. Save your most used folders for easy access so you don't have to drill down to find the folder every time you scan. Also, print important documents in your vault directly from the MFP, without the hassle of downloading and sending it for print separately.	WorkPath	In Time Tec

HP for Box (Special Edition)	<p>The HP for Box Special Edition (SE) Web App has been specifically designed to be deployed exclusively on the new HP Laser Jet 400 Enterprise and Managed devices launched in Feb. 2021. The Special Edition of this app provides the same functionality as the Workpath app, but it resides in the cloud, not on the device. It can be used to scan to and print from your Box cloud account using the printer control panel.</p> <p>The App optimizes workflows and worker efficiency with the following key features: Scans to, prints from or emails from Box in one integrated step using the printer control panel. Manage documents and apply document metadata directly from the control panel. Quickly locate stored documents using enhanced search and filter capabilities. Integrated document access and cloud account Sign In Once steps reduce steps in your workflow process and eliminates the extra step of downloading documents to the computer and then saving them to the repository.</p>	Non-WorkPath	HP Inc.
HP Mail Flow	<p>HP Mail Flow creates a new email integrated experience that allows users to read, reply, attach scans and print mail messages and attachments, all from the printers touch panel. Users can quickly reply to emails with scanned attachments while preserving conversational context. It will self-populate email addresses from your connected directory, transfer subject lines, and allows the selection of customizable preset Quick Messages.</p> <p>HP Mail Flow provides a direct connection that optimizes workflows and worker efficiency. Your existing email system displays directly on the MFP, including Inbox, Deleted and Sent files, and you can search or filter on all emails. It supports both Microsoft Outlook and Gmail email services, configurable during installation.</p> <p>The ability to directly attach a scan from your MFP into your email conversational threads has never been easier, requiring no additional learning. Simply open your Inbox from the MFP, hit reply, and scan the new attachment.</p>	WorkPath	HP Inc.
Connect to Remark Test Grading	<p>Created by In Time Tec, Connect to Remark Test Grading allows teachers to quickly distribute the test sheets (OMR sheets) to the students by printing them and grade the tests by collecting the answer sheets (Bubbled OMR sheets) and scanning them. Finally, the graded test reports can be sent through email for each student. So teachers can get more accomplished with less. It is a complete replacement for manual test grading. EveryonePrint HCP Authentication	The cloud has transformed how businesses deliver and manage applications, EveryonePrint's Hybrid Cloud Platform (HCP) extends that revolution to the print infrastructure. HCP enables organisations to seamlessly migrate an existing on-premise print environment to a cloud-based service, enabling the entire printing infrastructure to be deployed and controlled from a single web-based interface. The platform can be delivered as a hosted Software as a Service offering or installed as an on-premise private cloud. HCP is a fully scalable subscription-based solution meaning customers from SMEs to global enterprises simply pay for the licenses they need. By utilising cloud technology, organisations can reduce the cost and complexity associated with a traditional print environment. By eliminating print servers, Windows server licenses and the requirement to run clients on workstations, customers will benefit from significantly lower printing costs.	WorkPath	EveryonePrint A/S

PaperCut Hive Lite Release	<p>Print Management is getting hard. So hard that even our coffee-fuelled coding efforts feel decaffeinated. With the rise of cloud computing, much of the IT world has become simpler, scalable, and managed. Meanwhile, the rise of BYOD devices and expanding business requirements have led to print networks becoming increasingly complex.</p> <p>PaperCut print management software helps over 100 million end-users in 195+ countries minimize waste while having a secure and easy printing experience. We've built a cloud-native solution from the ground up utilizing modern IoT innovations such as Edge-Mesh technology. It keeps document data local and secure, delivers speedy performance, and provides a contactless print experience.</p> <p>PaperCut Hive simplifies today's complex printing environment, delivering modern and secure printing. There's no on-prem infrastructure required, which makes implementation, change management, and support a breeze. Bring HP Devices to the cloud with PaperCut Hive.</p>	WorkPath	PaperCut

docs2me for Box	Maintain simplicity while improving work efficiency using docs2me for Box. Incorporate your goal for a successful digital transformation with HP MFDs and Docs2me for Box. Work at unprecedented speed by using a smart and efficient document delivery solution, with an intuitive user interface and features that enable access to your Box documents, files and business workflows. Improve Box utilisation in your organisation with HP MFDs and docs2me for Box.	WorkPath	docs2me
XM Fax	The XM Fax app allows users to easily fax documents from HP Workpath multifunction printers and digital copiers networked on a PSTN- or VoIP-based infrastructure. Users can benefit from many features found in XM Fax On-Premises or Cloud solutions, available directly on the MFP console. For example, users can select recipients from the Fax Service phone books and add new entries to their personal contacts. The XM Fax app accelerates and streamlines document management. It creates audit trails to facilitate regulatory compliance, while greatly reducing telecom, long-distance and fax hardware costs.	WorkPath	XMedius Solutions Inc.
nddPrint Client HP	This module aims to control access to the MFP. This control requires user authentication to identify users who made copies and scans on the equipment, bringing assertive accounting.  The nddPrint Client HP also performs the printing secure releases: after authentication, the user will select, among the retained documents, which ones to print; directly on the equipment screen, it is possible to convert color documents to B&W or transform simplex documents into duplex, resulting in SAVINGS and providing greater security to users. Learn more about the nddPrint solution at <a href="http://nddPrint.com.br">nddPrint.com.br</a> .	WorkPath	NDDigital SA Software
Wallboard Display	The Wallboard Digital Signage platform is a cloud-based content management system now with the ability to broadcast custom and dynamic content across a fleet of HP MFPs. Your customers can now take advantage of their HP MFPs to deliver key internal communication messaging like safety protocols, recognition, events, news, weather - all in line to your customer's brand. All content is managed in an easy-to-use, intuitive web-based interface.	WorkPath	Wallboard

Biscom for Healthcare Info	The Biscom for Healthcare info app provides information regarding the availability of the HP Workpath Biscom for Healthcare app that integrates with Biscom Enterprise Fax and Secure Messaging solutions to support the secure document delivery requirements of healthcare providers.	WorkPath	Biscom Inc
HP for OneDrive Business (Special Edition)	<p>HP One Drive for Business Special Edition (SE) Web App has been specifically designed to be deployed exclusively on the new HP Laser Jet 400 Enterprise and Managed devices launched in Feb. 2021. The Special Edition of this app provides the same functionality as the Workpath app, but it resides in the cloud, not on the device. It can be used to scan to and print from your One Drive for Business cloud account using the printer control panel.</p> <p>The App optimizes workflows and worker efficiency with the following key features: Scans to, prints from or emails from One Drive for Business in one integrated step at the printer control panel. Manage documents and apply document metadata at the control panel. Quickly locate stored documents using enhanced search and filter. Integrated document access and cloud account Sign In Once steps reduce steps in your workflow process and eliminates the extra step of downloading documents to the computer and then saving them to the repository.</p>	Non-WorkPath	HP Inc.
EasyForwardHP	<p>easy.forward™ is an end-to-end Intelligent Data Management solution that combines the latest in AI technology and human verification to capture your documents and data completely, securely, and with 99.9% accuracy. The integration of AI technology means that your job will grow easier as your Scan-Optics powered tools learn how to help.</p> <p>Our machine learning document processing gets even more accurate with each task, and data storage is tailored to the specific needs of your system, ensuring you always have your data when and where you need it! Now fully integrated onto HP JetAdvantage App site, easy.forward™ has never been so accessible.</p> <p>The purpose of this app is to allow customers to sign up to the easy.forward™ service as a free trial and gain 100 fully captured documents, free.</p> <p>Customers can create an account to be able to use the service by entering their details on the register page. Once registered the users can log in but will have to wait for an email before they can scan.</p>	WorkPath	ScanOptics
SendStation APJ	Pitney Bowes introduces SendStation, the newest and simplest way to ship all your packages on your new HP Workpath printer. This offers an easy and convenient way to ship your packages via many carriers. By using the SendStation Shipping APP on this printer, sending packages will be faster, cost effective and convenient just like print, copy, fax and scan. This APP is currently configured to work in Australia (Sendle), New Zealand (NZ Post) & India (Shyplite). Please refer to the website below to set up your APP to get going.	WorkPath	Pitney Bowes
